

JOHN MAGUIRE & SON (EST. 1961)

WEIGHING MACHINE ENGINEERS & MANUFACTURERS

The MAG 3000 Platform Scale is a market-leading scale designed for a lifetime of heavy duty weighing.

- Constructed of heavy duty box section steel, fully welded, to give superior strength.
- 8mm Durbar plate heavily stitch welded underneath to give a long lasting, hard wearing platform.
- Spray finished in Zenith Blue hammerite protective paint.
- Platform height of 130mm.
- Four Revere ACB Shear Beam load cells, the best on the market, mounted on adjustable stainless steel/rubber feet to give the most accurate load transmission.
- Fitted with the Ian Fellows Ltd CSW-20 digital indicator as standard. Features include; 20mm bright LED digits, wall or bench mount, 12 product codes and tare codes with total facility, programmable short cut key, semi auto tare, Control inputs and 3 relay outputs, superlative digital filter for fast settle time, sophisticated filling software and RS232 port for printer or remote display. Coupled with industrial signal wiring practices and Revere load cells this ensures highly accurate, reliable weighing circuit and offers a variety of peripherals e.g. ticket printers, remote display or computer link.
- Standard size; 1500mm x 1500mm 3 tonne capacity.
- Professionally delivered and installed by our dedicated skilled engineers.
- Trade Approved.
